

PulsePro® PF SERIES

Plastic Pulsation Dampener

- Up to 95%+ Reduction in Pressure Spikes
- Corrosion Resistant Bodies | GFPP | PVDF
- Reduces Vibrations to Protect Instruments

Dosing System Schematic

Product Description

The PulsePro® PF Series Pulsation Dampeners are designed to provide protection for process instrumentation, eliminate vibration and provide smooth continuous flow.

The PulsePro® PF Pulsation dampeners are chargeable and can be adjusted to best suit the process requirements. The PF series can eliminate up to 95% of the pulse caused by positive displacement pumps.

The PulsePro® PF Series pulsation dampeners consist of a flexible PTFE Diaphragm and an upper and lower chamber. The upper chamber is pressurized with air or Nitrogen.

The PulsePro® PF Series operate on the principle that the volume of air in the upper chamber is inversely proportional to the kinetic pressure of the fluid being pumped.

Pulse | Surge Compressor

High Pulsations

Up to 95%+ Reduction in Pulsations

Features

- Easy to Install
- Lightweight Design | Small Footprint
- PTFE Teflon® Diaphragm
- Suitable for Viscous Liquids
- Reduces Damaging Effects of Water Hammer
- Provides Constant Flow Required for Flow Meters and Pressure Gauges

GFPP

PVDF

PTFE
